Trauma informed care: Assessment and implementation of change in a large academic medical setting

Jessica Loftus, LICSW, Partners HealthCare
Danelle Marable, MA, MGH
Debra Drumm, LICSW, MGH
CONFLICT OF INTEREST DECLARATION

The authors have no conflicts of interest
Objectives

1. Describe what trauma informed care is and what it looks like in their unique setting.

2. Explore the challenges of and opportunities for introducing TIC into multi-disciplinary complex systems.

3. Identify steps for cultivating buy-in from stakeholders and creating strategies to begin an implementation process for TIC within attendees' unique settings.
Massachusetts General Hospital

- Founded in 1811
- Harvard teaching hospital
- 950 inpatient beds
- 1.5 million outpatient visits
- 24,000 employees
- Largest NIH research center in the US
MGH Center for Community Health Improvement

Violence Prevention and Intervention
Helping Abuse and Violence End Now (HAVEN)
Police Action Counseling Team (PACT)
Violence Intervention Advocacy Programs (VIAP)

Human Trafficking Clinic
Nursing & Patient Care
Trauma and Surgery
Individual trauma results from an event, series of events, or set of circumstances that is experienced by an individual as physically or emotionally harmful or life threatening and that has lasting adverse effects on the individual’s functioning and mental, physical, social, emotional, or spiritual well-being.
Common Definition of Trauma Informed

A program, organization, or system that is trauma-informed:

• **Realizes** the widespread impact of trauma and understands potential paths for recovery;

• **Recognizes** the signs and symptoms of trauma in clients, families, staff, and others involved with the system;

• **Responds** by fully integrating knowledge about trauma into policies, procedures, and practices; and

• **Seeks to actively resist** *re-traumatization*.
Spreading Trauma Informed Care Across the Hospital

Outcomes Associated with ACEs: A Life Course Perspective

- **Childhood:**
  - Fetal Death
  - Developmental Delay
  - Behavioral Problems
  - Cognitive Impairment

- **Adolescence to Young Adulthood:**
  - Mental Health
  - Academic Achievement
  - Juvenile Justice

- **Adulthood:**
  - Mental Health
  - Physical Health
  - Disability
  - Early Mortality

Creating Cultures of Trauma-Informed Care (CCTIC):
A Self-Assessment and Planning Protocol

Roger D. Fallot, Ph.D. and Maxine Harris, Ph.D.
Trauma Informed Care Assessment Domains

This survey was created by the MGH Interpersonal Trauma and Violence Committee, an interdisciplinary group charged with assessing the hospital’s response to victims of violence. The committee decided to focus on Trauma Informed Care and Practice within the hospital. This includes policies around trauma informed care, how the care is put into practice, and ways to improve policies and procedures around trauma informed care.

We want to elicit your feedback about Trauma Informed Care in order to improve how MGH responds to survivors of trauma and the staff who care for them. Please be sure to answer each question so that we have the most complete data possible.

Policy and Organizational Commitment

Physical Safety

Patient Engagement

Staff Support
Trauma Informed Care Assessment

Process and Procedures of Assessment:

1. Setting the stage
2. Data collection (survey & focus groups)
3. Analyzing the data
4. Report back to stakeholders
5. Create strategic and implementation plan
Strengths/Observations

Slow and steady
Lessons Learned
Using “Trauma” at a Hospital
